Entry-level SOC Analyst with hands-on experience in security monitoring, alert triage, log analysis, and incident documentation gained through academic SOC labs and operational security roles. Strong foundation in Windows systems, networking fundamentals, and escalation workflows. U.S. Navy veteran with proven experience operating in high-pressure, procedure-driven environments. Seeking a Tier 1 SOC or security operations role.

SECURITY OPERATIONS & RELEVANT EXPERIENCE

SOC Analyst— Academic Lab Experience 2023-2025

- Monitored simulated SIEM environments for security alerts and anomalous activity
- Performed alert triage and basic incident analysis using log data
- Investigated suspicious events across Windows systems and virtualized networks
- Documented incidents, findings, and response actions following SOC workflows
- Escalated incidents based on severity and predefined procedures

Security Monitoring Agent — *Sentriforce* 2021

- Monitored systems and properties for security incidents and suspicious activity
- Responded to alerts by following incident response and escalation procedures
- Documented events and preserved evidence to support investigations

ADDITIONAL OPERATIONAL EXPERIENCE

United States Navy – *Operations Specialist* 2013-2018

- Monitored operational environments for anomalies and incidents in mission-critical settings
- Documented incidents and actions taken to support accountability and follow-on review
- Operated within strict procedures and escalation paths under high-pressure conditions
- Coordinated incident response activities by communicating status updates and following established handoff and escalation protocols

EDUCATION & CERTIFICATIONS

Associate of Applied Science – Computer Networking Systems (Cybersecurity Specialization)

Houston Community College 2023-2025

CompTIA Security+ (Scheduled: February 2026)

TECHNICAL SKILLS

Security Operations: SIEM fundamentals, alert triage, log analysis, incident documentation, escalation workflows

Systems & Networking: Windows OS administration, Active Directory basics, TCP/IP, DNS, DHCP, virtual environments

Tools: Splunk, Wireshark, Nmap, VirtualBox/VMware, PowerShell (basic)

PROFESSIONAL DEVELOPMENT

- Regular review of industry reports (CISA, Verizon DBIR, Mandiant)
- Regularly practices IT and security tools in structured lab environments to reinforce troubleshooting and documentation workflows
- Focuses on applying security and IT concepts to real-world scenarios, emphasizing alert context, incident handling, and operational best practices
